Dear Miss Cunningham:

I am sorry for this tardy reply to your letter of April 10th, but I hope it is better late than never.

I do not believe one word that the "midwife" told you five years ago. The news that your Fallopian tubes are open is good. If you have been having more or less regular menstrual periods, I see no reason why you cannot have more children.

Are you, by any chance, using this experience as a reason not to get married?

Here is the name of an older obstetrician in Buffalo. I do not know him personally but his qualifications are good.

Sincerely yours,

Virginia Apgar, M.D., M.P.H.
